MODENA FUNGHI

Modena Funghi is a family business that was founded in 1999 to directly market the mushrooms that the Rinaldi Farm has been growing since 1977 and the spontaneous Italian and foreign ones that it imports from the woods all over Europe. The two companies process and pack more than 15,000 quintals of mushrooms and distribute them directly with their own means at controlled temperature on the main supermarket chains and fruit and vegetable markets. Our main feature, in addition to the excellent quality of the product, is the speed of delivery: the service is in fact daily, characterized most of the time by the collection and timely delivery.
